

VIRTUAL HEALTHCARE PLATFORM

1. Introduction

- A website that displays all medical centers, details of their physicians, doctors, surgeons and enable a platform for patients as well as professionals to get themselves registered on the website.
- Benefits:
 - ❖ Through this website patients can get appointments prior to visiting the hospital.
 - ❖ Doctors can get themselves registered on the website by providing relevant details and get their patients through the website

2. Expected List of Features

- Location-wise list of hospitals:
The patient can discover new clinics of their area and visit new doctors that lie within their budget.
- Pre-Booking:
Once the patient has decided the hospital, pre booking for the appointment to the doctor can be done. But, once the payment has been done has visit has been confirmed, no payback guaranteed.
- Registration:
Doctors can make their profiles and get themselves registered on the website. Patients must register themselves before accessing the appointment procedure.

3. Market Survey

- All the links provided in the references depicts the idea of virtual healthcare system. These website provide list of doctors, their details as well as pre booking system.
